Subject: Intimation under Regulation 30 of SEBI (Listing Obligations & Disclosure Requirements) Regulations, 2015, in connection with Participation in Urban Air Mobility Expo 2025

Dear Shareholders,

We are delighted to inform you that Aerpace Industries Limited will be a prominent participant at the **Urban Air Mobility Expo 2025**, set to take place from **January 19th to 22nd 2025**, at the India Expo Centre & Mart, Greater Noida, Delhi-NCR. This platform will showcase our transformative innovations in urban air mobility and reinforce our leadership in redefining transportation and accessibility.

Showcasing Aerpace's Vision

In a world where connectivity defines progress, Aerpace emerges as a beacon of innovation, bridging the gap between metro cities and the remotest corners of the nation. At the heart of Aerpace lies its groundbreaking mobility ecosystem, which seamlessly integrates cutting-edge technology with sustainability.

We are proud to introduce **AerWing**, the world's first system capable of elevating personal vehicles and transporting them via drones. This revolutionary concept, **AerDrive**, allows individuals to journey in their own vehicles, combining ground-level comfort with aerial efficiency. Beyond personal transport, AerWing's categories include:

- **AerCargo**: Freight solutions for fast and efficient goods movement.
- **AerCare**: Emergency medical transport to save lives in critical situations.
- **AerTaxi**: Urban commute solutions tailored for cityscapes.

Rural and Urban Connectivity

Aerpace's vision extends beyond urban areas to ensure that rural and urban regions are equally connected. Our **AerDocks**, equipped with solar-powered roofs, will serve as hubs for clean energy generation and seamless mobility. This innovation facilitates faster transportation of perishable goods for farmers and ensures critical emergency support reaches the most isolated regions.

A Showcase of Innovation

At the Urban Air Mobility Expo 2025, Aerpace will present a **physical model of our ecosystem** to demonstrate how our solutions work in practice. Visitors will witness how Aerpace is solving logistical challenges and rewriting the narrative of accessibility.

Driving Innovation from Chakan, Pune

Our state-of-the-art facility in Chakan, Pune, is the cornerstone of these innovations. Here, Aerpace develops advanced drone systems and solar technologies through partnerships with global tech leaders, combining local expertise with international standards.

Event Details

For more information about the expo, visit the official website: <https://urbanairmobilityexpo.in>

To explore Aerpace's participation and innovations, visit:
